## **Zeeco Middle East Expands Manufacturing Facility as Part of IKTVA Program**

11 July 2023 – DAMMAM, SAUDI ARABIA – Zeeco Middle East announced today that it has acquired an additional 5,000 m<sup>2</sup> of industrial land to implement the third expansion of its fabrication and storage facilities and an additional two-story administrative and engineering office building in preparation for an expanding workforce of Saudi nationals. The additional 5,000 m<sup>2</sup> fabrication area expands upon Zeeco’s existing operations and footprint in Dammam, bringing its total industrial area to 17,500 m<sup>2</sup> and continuing its dedication to Saudi Aramco’s In Kingdom Total Value Add (IKTVA) program.

Mohammed Abugharbieh, Zeeco’s Country Manager in Saudi Arabia, said, “Built within our site expansion, the additional fabrication facility will grow our engineering and manufacturing capabilities, enhancing our annual production above 250,000 man-hours and increasing our output of advanced combustion and environmental equipment. Here, we will fabricate burners, flares, flare gas recovery systems, vapor recovery systems, thermal oxidizers, reaction furnaces, and other equipment while increasing the local content and hiring more Saudis.”

Zeeco currently employs over 145 people at its Saudi facility and the expansion is part of its commitment to providing more quality jobs for a growing Saudi workforce.

Darton Zink, Zeeco’s President and CEO, said, “We are proud to partner with Saudi Aramco as we work to grow our in-kingdom business, footprint, and value. This expansion will bring business to our in-kingdom vendors who supply equipment and resources to Zeeco and will be crucial to helping us increase our employment and training of Saudi nationals.”

**About Zeeco:**

Founded in 1979, Zeeco has steadily become the world leader in designing and manufacturing advanced combustion and environmental solutions. Headquartered in Tulsa, Oklahoma, USA, Zeeco is a privately held business with more than 2,000 employees and 25+ global locations. The company has executed 60,000+ projects for refining, production, petrochemical, LNG, power, pharmaceutical, biogas, and other industries. ZEECO® products and solutions include ultra-low-NO<sub>x</sub> burners, flare systems, thermal oxidizers, vapor control, rentals, aftermarket solutions, global field services, and combustion electronics. Zeeco’s comprehensive offering helps customers reduce emissions, optimize processes, and maximize operating efficiency while meeting global environmental compliance requirements. Zeeco also operates the world’s largest combustion research and test facility and a 100,000 ft<sup>2</sup> (9,290 m<sup>2</sup>) manufacturing facility on a 250-acre campus in Broken Arrow, Oklahoma, USA.
