

# Zeeco High Energy Igniters (HEI)

## Zeeco

## Others

- Full replacement of existing HEI systems or high tension (voltage) ignition systems
- Reliable light-off with self cleaning capacitive discharge and 360° spark surface
- 4J or 12J option to replace complex unreliable gas/oil ignition systems
- Zeeco designs “plug & play” direct replacements of other manufactures’ ignition systems or new panel solutions
- Available with/without retract assy.

- Carbon steel rods that oxidize and ceramic insulators that can crack and short circuit
- Low spark rate or low Joule (J) heat output that does not reliably sustain fuel ignition
- Gas/oil igniters require costly fuel trains and complex control systems
