## Vapour Control Systems-Services

**Zeeco** is known for combustion equipment & services, you may not be aware that Zeeco has a Vapour Control division, based in the UK & covering all of the EU countries, we are able to offer a variety of After Sales services for Vapour combustors (VCU) & Vapour Recovery Units (VRU) from all equipment vendors.

Experience- over 20 years in Vapour Control Systems with 70+ units worldwide, our UK based service team & colleagues in Netherlands, Romania, Poland allow us to support EU wide users. Zeeco's integral controls, engineering, project management, procurement departments give us the capability to meet any of your requirements, even on equipment from other vendors.

These services include-

- Routine preventative maintenance services & contracts
- Operational trouble-shooting on new & old units of all vendors
- Re-training services for your personnel
- Spares or replacements of obsolete parts
- Carbon Changes & Carbon Testing/verification- we have our own laboratory in the UK
- Revamps/Overhaul of vacuum pumps & control systems
- Process validation of your unit- can do more, can it be improved to reduce emissions
- Advice & a second opinion on other vendors equipment & Quotes

We have long recognized the importance of helping our customers get the balance between preventative maintenance and reactive maintenance right for their combustion equipment; this is equally true for Vapour Recovery systems. Vapour Recovery Units which are complex mechanical and electrical systems operating in hazardous atmospheres.

An important aspect of our service would be to help you monitor and maintain emissions within legislative limits in a safe, controlled and repeatable manner. Not only would you get a trained Zeeco Engineer attend your site, but they would also have access to Zeeco's considerable corporate resource in resolving whatever combustion or vapour issues you may have.

All our Service Engineers hold a formal engineering qualification (minimum of a UK national diploma) which underpins specialist Zeeco training and considerable 'in the field' experience.

We offer the full range of services from preventative maintenance to intervention on Demand, from erection and commissioning of units to controls investigation and training. We are able to offer a 24/7 emergency call availability and will happily offer a bespoke maintenance contract, to meet your needs and ensure the serviceability of your equipment.

If you are currently working with another service provider- we would welcome the opportunity to visit you and present in fuller detail what we can provide and if appropriate, open discussions about possible service agreements. Should you have any questions or require additional information then please do not hesitate to contact us. In the meantime, please be assured that Zeeco stand ready to assist you when you require our services.

## PRODUCTS AND SERVICES

**Preventative Maintenance:** Truck Rack Vapor Recovery / Vapor Combustors, Marine Vapor Recovery / Vapor Combustors, Rail Vapor Recovery / Vapor Combustors, Continuous Emission Monitors, Booster Blower Skids, Vacuum Blower Skids and Dock Safety Skids

**Emergency Service 24/7/365:** Truck Rack VRU / VCU, Marine VRU / VCU, Rail VRU / VCU,

**Critical Spare Parts:** Valves, Actuators, Glycol, Carbon, Transmitters, Detonation and Flame Arrestors, Vacuum Pumps, RTD's, Thermal Couples, Pilots, Burner Tips, PLC Components and Circulation Pumps.

**Equipment Turnarounds:** Yearly Turnaround Planned Extensive Maintenance.

**System Upgrades:** PLC and Programming Software, Actuators and Valves, Carbon, Pilots, Liquid Seal Pot to DA

**System Retrofits:** Wet pump to Dry retrofits, Pilot Retrofit, PLC Retrofits, Vacuum Pump Retrofits

**Carbon Testing:** Working Butane Capacity, System Performance, Dust Compaction, Hardness

**Carbon Replacements:** Turn Key Removal, Replacement and Saturation of Your System Carbon

**New System Commissioning:** New Vapor Recovery, Vapor Combustion or Flare System Commissioning.

**Unit Relocations:** VRU's, VCU's and Flare Systems all Manufactures

**New Unit Installation Support:** VRU's, VCU's and Flares

**Automation Networking:** Integration Support from your VRU, VCU or Flare Emission control device to your Terminal Network

**Engineering Design Evaluations:** Evaluate and Verify if Your System is Correctly Sized for Your Operation.

**24/7/365 Remote Monitoring Support:** Let ZEECO Remotely Link to Your Unit to Support you with Maintenance and Troubleshooting

**Re-training your crew/personnel:** Staff turnover can leave you with scant knowledge of even how to operate the unit, Zeeco can help

**Trouble Shooting:** We are able to help with issues on other vendors equipment- high emissions, frequent breakdown/failures, vibration etc.

**Process Knowledge:** We are able to help with issues that other vendors can not or will not.
